

## IDOR: D'Or Institute for Research and Education offers a 10-day Research Program for University students.

The selected research students will have the opportunity to explore the backstage of science, discovering details behind the conception, execution, and publication of research results. The major focus will be basic, translational, or clinical research, as each student will be assigned a laboratory and a faculty mentor. Students will have the chance to meet scientists and health professionals. No prior research experience is required. The goal of this Research Program is to encourage health and scientific careers in diverse medical disciplines. Also, transdisciplinary experiences will be incentivized.

### The students will have the opportunity to:

Work in IDOR facility.

Engage with esteemed scientists and health professionals, a rare opportunity that can ignite your passion for the field.

Participate in hands-on activities that will challenge your mind and inspire your creativity.

During the program, seminars by faculty and industry leaders will offer students a window into career opportunities in the field.

Expand the professional network by meeting renowned scientists and interacting with other students. This can lead to internships, research opportunities, and careers in healthcare.

Students also will develop technical, practical, and analytical skills, which can help them to better prepare for the challenges of the job market.

In addition to research in a faculty mentor's lab, students will learn about different career paths and present their work experience to the IDOR science community.
